PLANETS

Planets are small
but when you are in them, BIG!
How are you in them?
What makes you feel small
in a BIG planet?

I'm fine. I felt I had a good experience.
I feel that everything looks huge
in front of me!
Even when I reach out
to hold my friend's hand
I feel the planet is unreachable.
The planets implant illusions in our minds.

FRAGMENTS

The ways of life
are imperceptible.

Any alternative?
What if we changed
the astral models?

Longing... still longing...

The ways of life
are missing.

Any alternative?
What if we changed
the astral models?

Yearning, always yearning...

-Poem by Dr Vassiliki Rapti
